

Designed for Tropical Living

Positioned within the sought after Oceans Edge estate in Palm Cove, within walking distance to the beach and overlooking the lake, this home has been carefully designed to reflect its setting. It embraces outdoor living, seamless indoor and outdoor connection, and an appreciation of the natural surrounds that draw people to Far North Queensland.

Personally designed by Mark and Sharna Price, the owners of Unique Constructions, this display home is the result of decades of hands-on building and design experience. As a family-run custom home builder based in Cairns, we believe the best homes come from being directly involved at every stage. When you build with us, you deal directly with the owners — from initial design discussions through to construction on site.

With Mark's background in building and structural design spanning over two decades, and Sharna closely involved with clients from the initial design stages through to selections and handover, every element of this home has been thoughtfully considered.

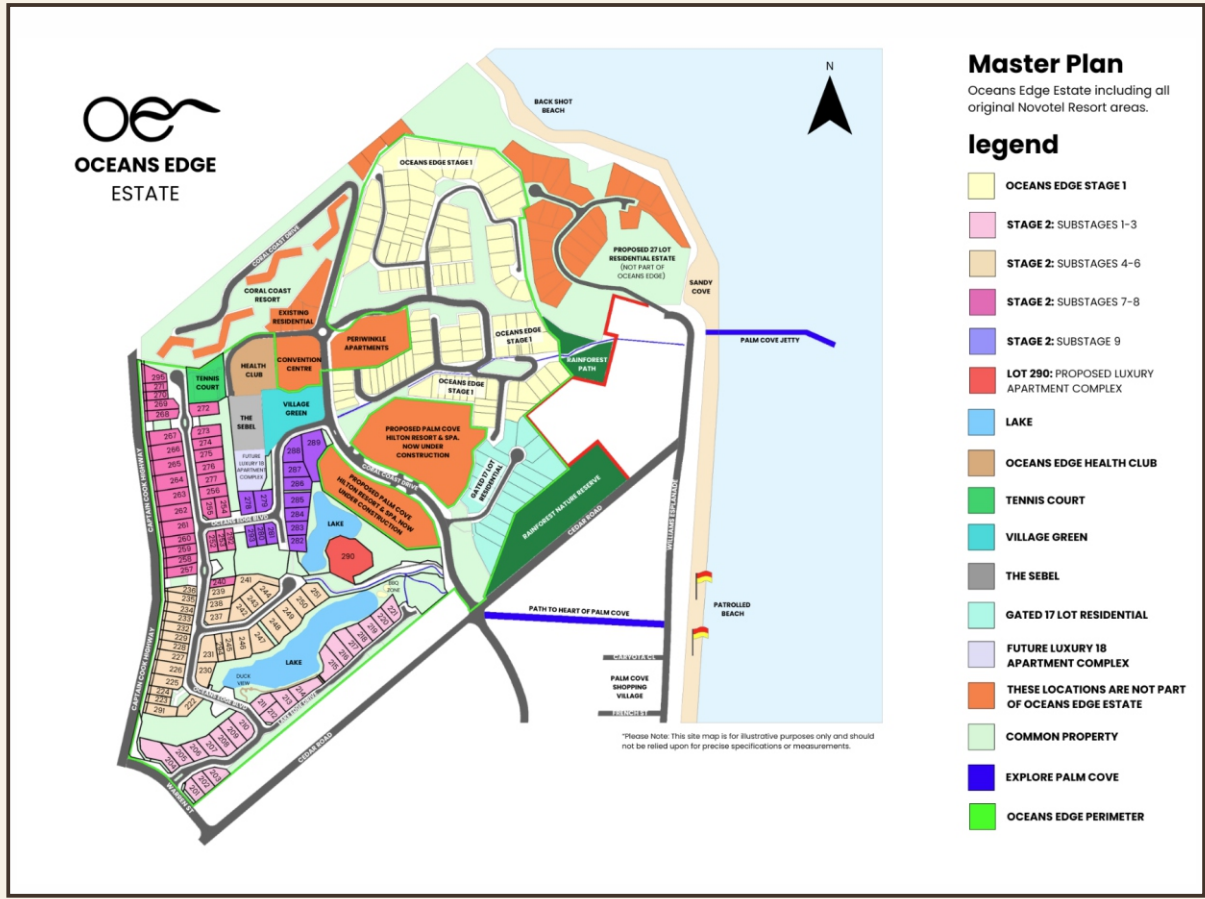

IMAGE GALLERY

The home showcases generous open-plan living, multiple bedrooms including guest accommodation, and strong connections between indoor and outdoor spaces. Designed specifically for its lakeside position, the home captures light, outlook, and breezes while maintaining privacy and comfort. This is not a standard design — it has been created specifically for this site, this climate, and this lifestyle.

Throughout the home, you'll find bespoke features and carefully selected finishes that elevate the overall design. This display has been created to showcase what's possible when a custom home is designed from the ground up, without compromise.

Opening in 2026, our Palm Cove display home will offer visitors the opportunity to experience a truly unique home designed and built for Far North Queensland living — a reflection of our hands-on approach, local knowledge, and commitment to quality homes.
